Coffee Corner Furniture

The rheavendors staff at the EuVend Tradefair
Cologne Germany - May 2019

It doesn't have to be complicated.
It just has to be smart.

Today, the increasingly rapid and sometimes overwhelming pace of innovation is continually revolutionizing the ways people interact with the world, and consequently reshaping the way we do business.

Once well-defined contexts like bars, restaurants, hotels, showrooms, shops, public spaces and workspaces are undergoing a process of profound transformation, intersecting to the point where they are practically seamless.

This requires solutions that adapt to multiple and overlapping functions, which in turn create a demand for products whose design must be both practical and innovative in terms of form, materials, ease of use

and cost effectiveness.

Rheavendors responds to this challenge with a new range of modular beverage stations that intelligently combine our tabletop coffee and soft drink machines with attractive and versatile furniture that can be configured to your needs.

This solution not only allows you to consolidate the chaos that normally surrounds a coffee machine (cups, utensils, sweeteners, cream, unsightly trash bins) and thus greatly improve the aesthetics of your beverage station, it also helps you reduce the frequency of monitoring and servicing, thereby saving both time and money.

WOODY

Coffee Corner Furniture

WOODY

Compact coffee shop

WOODY is the premium version of Rheavendors's new line of drink stations. It's solid, it's sturdy, and an elegant and practical addition to any public or private space.

WOODY is designed to embed every technical necessity, like cables, water feeds or tanks, and Rheavendors modul>on cup dispensers.

Best of all, it eliminates the problem of frequently emptying the used coffee grounds by placing the waste receptacle not inside the machine – a traditional limitation of all tabletop models - but in the spacious cabinet below. This means less maintenance, fewer interruptions of service, and increased earnings.

WOODY also offers illumination options to highlight your products and brands, and its solid construction invites the installation of flatscreen monitors, blackboard menus, or display racks for other products.

Coffee Corner Furniture

JANUS

Whatever you want it to be

Built from reinforced cardboard, JANUS comes with a printed wood veneer and an invisible layer of varnish that makes it even more durable, but no less eco-friendly.

That same veneer is totally customizable and can be printed with literally anything, from your corporate colors to the menu of the drink station you've created. Perfect for a pop-up store, where communicating your brand is a top priority.

It has a built-in cup dispenser, one drawer, and two spacious cupboards for storage and waste.

Optional glass countertop and lighting configurations.

ECO

Coffee Corner Furniture

ECO Simple, sustainable, smart

Plastic-free and recyclable, ECO is built of reinforced corrugated cardboard.

It's lightweight yet sturdy, resistant to moisture, easy to transport and assemble, and eco-friendly.

It has one drawer for utensils and condiments, and three cupboards for supplies, water tanks, used coffee grounds and trash.

Optional glass countertop and lighting configurations.
